

CASE STUDY:

From Dread To Pure Excitement

How one Trust has gone from 70%-90% compliant and are on track for 100% compliance this year.

"It's a complete mindset shift! It's no longer dread, it's pure excitement! We're excited for the data, and on "Robin Day" it's a morning to celebrate!"

Robin is the best investment we've made. It's really, really good.

It's a time saver, it's robust and good value for money - it just gives us that complete assurance."

Georgina Fahey

Head of Governance & Compliance

Athena Learning Trust

Number of schools: 9

Trust location: Devon & Cornwall

Before Robin

- **Manual and Time-Consuming:** Checks often took days of work.
- **Stressful:** There was a feeling of "chasing their tail" and being reactive.
- **Uncertainty about requirements:** Questioning if they correctly understood the requirements.

Why Robin?

- **Robust and good value for money**
- **Reduced Ofsted preparation**
- **Easy and clear reporting to trustees**
- **Can check prospective schools websites**

The Impact

1. **Significant compliance improvement:** Overall school website checks have gone from 70% to 90% compliant in 6 months.
2. **Gaining hours, gaining confidence:** From 2 days work to a few hours, Robin gives complete peace of mind as it just, "...ticks over nicely in the background."
3. **Proactive compliance management:** "Because of the work Robin does for us, we've now got capacity to proactively look ahead to future compliance deadlines."
4. **Data-driven improvement:** "We share the school comparison data, which is in a nice format, to increase healthy competition between our schools. As we want all our schools to be 100% compliant."

"I used to dread website compliance, and the 2 days of work, but now I actually look forward to the day we get the results."
